DENIL JOHN **FRONTEND DEVELOPER** **Permanent Visa Holder in Australia**	Email Id – **denilj6@gmail.com** Ph: **0400868220** Location: **Melbourne,Victoria** LinkedIn: https://www.linkedin.com/in/deniljohn-90a2bb134/

Summary	● Senior software developer with diverse experience working with react native libraries and different mobile frameworks ● Experience in designing and developing highly scalable applications using technologies like **React native,Flutter, Redux, TypeScript, JavaScript, Java and React JS** ● Experience working in Agile methodology with DevOps, TDD practices using tools like Jira, Junit, Jest ● Experience setting up and developing Mobile applications in react native and native android.

Education	● B Tech, Computer science and Engineering [2013-2017]

	Category	**Primary skills**	**Secondary skills**
Core competencies /skills	**Domains**	Banking, E-Commerce	Media
	Tools/Frameworks	**React Native,Flutter, Node, Redux, CI/CD, Rest/GraphQL, React JS,Reactotron,Content Stack,ExpoFirebase**	Figma
	Databases	**MySQL Graphql Interactions,**	Firebase
	Bug/Issue-Tracking System	**Jira**	Firebase crashlytics
	Programming skills	**JavaScript, Java**	TypeScript, Scala

Expertise	● **React Native, Redux** ● **Node** ● **Java,React JS,Kotlin** ● **Native Mobile app Development**

Certification	● Internal certifications for React Native and React JS

Awards	● Best team Player (Reubro International -2017) ● Endorsed for displaying the value of Customer Centricity.

Experience Summary	● **Software Developer** [Oct 2024 -Present] - **Australia** o React Native, React JS,Kotlin, Java o Developed React native mobile apps with TDD o Developed CI/CD pipeline using Jenkins , Junit o Developed and deployed various apps in store o AWS and Firebase

- **Software Developer** [Jan 2022-Apr 2023] - **United Kingdom**
  - o Javascript, GraphQL, Jest, Concourse/TeamCity,CI/CD
  - o Helped improve sales significantly with CRO for Sky client
  - o Responsible for the design and implementation of the interface. High quality optimized code with test driven development. Responsible for cross browser testing and responsive optimization.
  - o Developed various React based reusable components
- **Software Developer** [2018- 2021]
  - o React Native, React JS,Flutter, Java
  - o Developed React native mobile apps with TDD
  - o Developed CI/CD pipeline using Jenkins , Junit
  - o Developed and deployed various apps in store
- **Software Engineer** [2017-2018]
  - o Java
  - o Developed Java based android application and deployed in playstore.

PROFESSIONAL EXPERIENCE

Project – FreightCyber and Gforce at Freight Cyber [Oct 2024 to Present] - Australia
   Role: Senior Mobile app Developer

Project Description: Freight Cyber is a dynamic force in the supply chain technology world. We're committed to transforming the landscape of freight management through innovative solutions

GForce is with highly trained sales representatives utilising strong selling skills, who are motivated and dedicated to obtaining the best product position for your products.

Key activities performed:

- ❖ Developed core components for Mobile apps and assignment using **React Native, TypeScript, Redux, Java and custom component library and with expo**
- ❖ Implemented third party libraries and Interaction with different Node and Node APIs
- ❖ Worked in fast-paced environment.
- ❖ Worked with Content Stack for CMS management.
- ❖ Aws oriented development using DynamoDb for offline
- ❖ Enabled **CI/CD** for micro-services using tools like **JUnit, Git,** following **TDD** practices
- ❖ Implemented apps using Class,Hooks and worked in TypeScript.
- ❖ Firebase implementation for push notification, tracking and crashlytics
- ❖ Project management and cordination of the team.

Technology/Skills/Tools used

- Technologies: **React Native and ReactJS,, GraphQL, Jest,kotlin**
- Tools: **Jira, Confluence, Concourse, TeamCity, Octopus,Firebase**
- Skills: **React JS/Node JS Developer, TDD based Development.**

Any client appreciation

- Recognized by client and manager for Implementing Load restraint module and custom protractor to measure angle

Project – Sky at Zensar Technologies [Jan 2022 to Apr 2023] - United kingdom

Role: Software Developer

Project Description: Improve Conversion rate for Sky Broadband and Glass using React JS, GraphQL, Node JS

Key activities performed:

❖ Created multiple **React** based **reusable components** following various design practices
❖ Developed a functionality to store user preferences in broadband checkout journey **improving user experience**
❖ Improved **error handling** in code for overall broadband journey
❖ Used **Jest** as testing framework

❖ Involved in deployment of new release on production environment with senior developers in **TeamCity/Concourse** and **reviewed pull requests** of peer associates
❖ Involved in Graphql Management

Technology/Skills/Tools used
● <u>Technologies:</u> **React Native and ReactJS,, GraphQL, Jest**
● <u>Tools</u>**: Jira, Confluence, Concourse, TeamCity, Octopus**
● <u>Skills</u>**: React JS/Node JS Developer, TDD based Development.**

Any client appreciation
● Recognized by client and manager for developing functionalities and experiments which helps dramatic increase in conversion rate.

Project – SmartTONi Mobile App at PIT Solutions Pvt.Ltd,[Sep 2018 to Mar 2021]

Role: Software Developer

Project Description: It is revolutionizing foodservice industry by robotizing the staff-intensive kitchen of any restaurant type. Based on recipes and orders, It coordinates and instructs cooks, appliances and robots in order to deliver the meals in the requested quality and time.

Key activities performed:

❖ Developed core components for Mobile apps and assignment using **React Native, TypeScript, Redux, Java and custom component library.**
❖ Developed more UI based mobile application.
❖ Implemented third party libraries and Interaction with different Node and Node APIs
❖ Worked in fast-paced environment.
❖ Worked with Content Stack for CMS management.
❖ Used **Jest** as testing framework
❖ Modular and Intutive Architecture development for mobile apps.
❖ Enabled **CI/CD** for micro-services using tools like **JUnit, Git,** following **TDD** practices
❖ Implemented apps using Class,Hooks and worked in TypeScript.
❖ Project management and cordination of the team.

Technology/Skills/Tools used

- **Technologies:** ReactNative , Redux, TypeScript, Java,Kotlin, Jest, Junit, React JS.
- **Tools:Content Stack,** Jira, Confluence, Octopus,Git,Bit bucket.
- **Skills:** React Native/React JS/Java Developer

Major achievements

- Recognized by Client for delivering fast and accurate solutions.

Project – Android Applications at Reubro International Pvt.Ltd, [Aug 2017 to Jul 2018]

Role: Software Engineer

Project Description: Develop native android applications for government and other clients

Key activities performed:
- ❖ Developed Android **Mobile** application using Java and XML
- ❖ **Deployment** of the applications to playstore and maintains.
- ❖ Lead and coordinate the team
- ❖ Interaction with International Clients.

Technology/Skills/Tools used

- **Technologies: Java,XMl**
- **Tools:** Jira, Confluence, Postman,Bitbucket, Android Studio
- **Skills: Java Developer**

Major achievements
- Received Client appreciation for implementing complicated design oriented apps.
